Virtual Tours are a proven way of enhancing your home's exposure online. Research from the National Association of Realtors® in 1999 has shown that **70% of Internet home searchers find virtual tours either very valuable or extremely valuable in their home search process!*** And as an additional benefit when you link your iPIX® Virtual Tour to your Yahoo! Real Estate listing, your property will be showcased as a [Yahoo! Real Estate Featured Listing!](#)

Ordering an iPIX® Virtual Tour is simple and easy. You don't need to be Internet savvy or even a licensed real estate agent to have access to this powerful listing tool. [iPIX Service Providers](#) are available in thousands of cities and towns throughout the United States and Canada. Soon after you place your order, a Service Provider near you will be dispatched to film your property. Your virtual tour will be available a few days later for linking to your Yahoo! Real Estate listing. Powered by ViewAlways™ technology, iPIX® Virtual Tours can be viewed on 99.9% of all Internet platforms without the need for plug-ins or software downloads.

Interested in an additional way to promote your property? When placing your order, make sure to request the optional **iPIX® Email Virtual Tour**. It's a stand-alone executable file that contains all of the scenes from your virtual tour that you can either email or save to a floppy diskette. Prospective buyers you share it with can then see inside of your property, even if they don't have access to the Internet. And since it also contains all your contact information, it's like a "Virtual Business Card" for your property! [Read more about this exciting product and download a sample now!](#)
